## Summary

- A highly motivated Bachelor of Computer Science with Honours (Information Security and Assurance) fresh graduate with Google Data Analytics Professional Certificate and Google Business Intelligence Professional Certificate.
- Strong analytical and problem-solving skills with experience in data collection, cleaning, analysis, and visualization with proficiency in Spreadsheets (Microsoft Excel & Google Sheets), Databases (SQL), Data Visualisation (Tableau & Microsoft Power BI) and Programming Languages (Python & R).
- Attention to detail and the ability to work effectively in a team where I seek opportunities to apply my skills and knowledge to drive data-driven insights and business outcomes.

## Experience

### System Analyst

Petaling Jaya, Selangor, Malaysia

PIPELINE NETWORK SDN. BHD. | FULL-TIME

Aug 2022 - Jan 2023

- Work alongside clients, subject matter experts (SME), developers and project managers by communicating with them about the designated project to ensure it goes smoothly by documenting the requirements, doing data transformation and creating dashboards. Next, follow through the Software Development Life Cycle (SDLC) as each phase significantly contributes to submitting deliverables before the deadline.

### Analyst Intern

Bangsar South, Kuala Lumpur,  
Malaysia

SETEL VENTURES SDN. BHD. | INTERNSHIP

Mar 2022 - Jul 2022

- In the SWARM: POS team consists of a lead analyst and interns. The responsibilities are tracking, fixing, documenting and communicating with other departments to solve problems regarding the system and categorizing any incoming flaws using various tools and software. Daily tasks include updating ticket bugs' status and gathering information for dashboard reporting to show the latest persistent day-to-day issues.

## Capturing and Retrieval of Risk Assessment and Risk Control Information for Laboratory Experiment

*GitHub*

FINAL YEAR PROJECT RISK ASSESSMENT AND RISK CONTROL

*Feb 2021 - Jan 2022*

- I used the Waterfall Methodology starting from planning, analysis, design, development, testing, implementation, and maintenance for the web-based system to make the project as smooth as possible. The tools and software I have used are Python Programming Language, Django framework and SQL (SQLite for the local host, then moved to PostgreSQL during deployment). I uploaded them into GitHub and Heroku to deploy, manage, and scale the app.

# Skills

---

- Data Analytics • Spreadsheets • Databases • SQL • Programming Languages • Python (Programming Language) • R (Programming Language) • Dashboards • Data Visualization • Tableau

# Awards

---
